

$9 \times 8 = \underline{\quad}$ $45 \div 9 = \underline{\quad}$ $8 \times 7 = \underline{\quad}$

$24 \div 4 = \underline{\quad}$ $5 \times 2 = \underline{\quad}$ $63 \div 9 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$ $32 \div 8 = \underline{\quad}$ $3 \times 9 = \underline{\quad}$

$20 \div 5 = \underline{\quad}$ $7 \times 8 = \underline{\quad}$ $21 \div 7 = \underline{\quad}$

$8 \times 6 = \underline{\quad}$ $18 \div 2 = \underline{\quad}$ $3 \times 6 = \underline{\quad}$

$9 \div 9 = \underline{\quad}$ $8 \times 5 = \underline{\quad}$ $63 \div 7 = \underline{\quad}$

$4 \times 7 = \underline{\quad}$ $12 \div 3 = \underline{\quad}$ $9 \times 9 = \underline{\quad}$

$72 \div 9 = \underline{\quad}$ $1 \times 5 = \underline{\quad}$ $18 \div 6 = \underline{\quad}$

There are 12 birds in 3 nests. How many birds are in each nest if each nest has the same number of birds?

 birds

8 7 56

There are 56 horses.

They are in groups of 7.

How many groups? 8

5 8 40

There are _____ boys.

There are _____ in each room.

How many rooms? _____

3 9 27

There are _____ birds.

There are _____ in each cage.

How many cages? _____

9 8 72

Robin sees _____ bluebirds.

There are _____ in each tree.

How many trees? _____

6 5 30

There are _____ swans.

There are _____ in each lake.

How many lakes? _____

9 4 36

Li has _____ baseball cards.

There are _____ in each pile.

How many piles? _____

7 7 49

Paulo has _____ stamps.

He puts _____ on each envelope.

How many envelopes? _____

3 7 21

Noel wraps _____ presents.

Each friend gets _____ presents.

How many friends? _____
