# Collections

Adding Video Supports to Collections

This guide shows educators and administrators how to add video tutorials to Collections. Collections in the TouchMath Digital Solution are saved curriculum sheets, resources, and video tutorials. Collections allow quick and easy access to organized folders of resources and support tools. Collections can be created for specific students, groups of students, math topics or skills, or curriculum resource types (i.e., pretest and posttests, student activity sheets for a specific day or week, etc.).
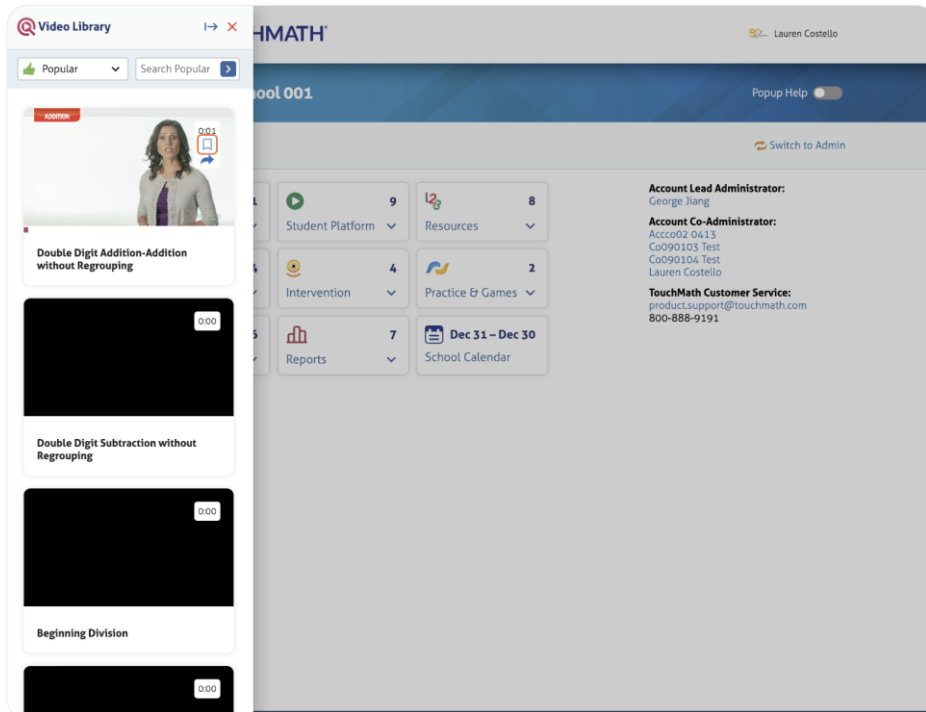

1   To view or create Collections, select the dropdown menu on the Collections tile. To create or add a new Collection, select Create New Collection

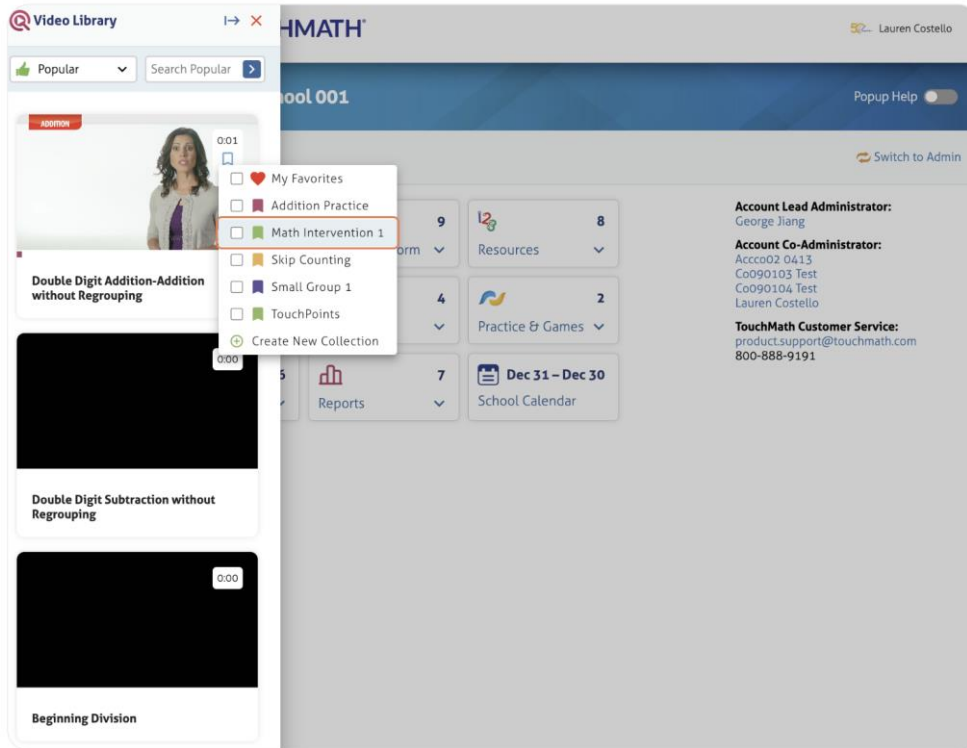

TOUCHMATH®

3   Return to the MyTouchMath Dashboard. Select the Video Support icon slider on the side of your screen

4   The Video Library will appear. To save a Video Tutorial to a collection, select the Collection icon on the video

5　From the dropdown list, check the box next to the collection to save

6　After successfully saving a video from the Video Library, a green Added to Collection notification will appear
